

Western Alaska Minerals is focused on advancing its 100% owned "Illinois Creek Mining District" (>73,000 acres) which contains targets originally discovered by Anaconda Minerals in the 1980s and was consolidated by the WAM management team over the past 10 years. The portfolio of five high-grade, evolving mineral projects contain: gold, silver, copper, lead, and zinc including a silver-rich Carbonate Replacement Deposit (CRD) and a NI 43-101 oxide gold resource at the Illinois Creek deposit.

Become a Part of Our Team

There are many career development opportunities available for motivated and goal-oriented individuals.

Work with us and you will benefit from the mentorship and guidance of experienced team members because we understand that in order to accomplish our goals, we must work as a team and rely on the effort of every team member.

Position

Geologist - Core Logger (Fixed Term - 4 months)

Location

Illinois Creek Camp, Alaska on a Rotational Basis

Summary

The Geologist - Core Logger is responsible for providing best practice core logging and geological work to ensure meeting the exploration objectives.

Key Responsibilities

- Geological and geotechnical core logging.
- Core sampling and data entry using established procedures.
- Core cutting of selected drill core assay samples.
- Assist in the training and supervision of geotechs and core cutters.
- Prepare sample shipments.
- Assist in geological field work, surveying and overall drilling logistics as required.
- Support the Geology team as needed.
- Other duties as assigned.
- Roles and responsibilities may be re-evaluated and modified from time to time.

Education & Experience

- Bachelor of Science in Earth Sciences.
- 1 to 3 years of experience in exploration, mining, or related fields. Can include time spent in an applied economic geology post-graduate research and field programs.
- Core logging and/or geological mapping experience required.

Other Skills & Abilities

- Focused, self-motivated and well organized.
- Strong data analysis and interpretation skills.
- Well-organized with ability to prioritize.
- Excellent communication and interpersonal skills.
- Ability to work well in a team environment with all members of our workplace.
- Attention to detail and problem-solving ability.
- Facilitate and manage own workload with minimal supervision in a demanding remote environment.
- Working knowledge of one or more industry standard software packages, such as ArcGIS or QGIS, ioGAS, Leapfrog Geo, and AcQuire.
- Knowledge or experience of resource modelling would be a bonus.
- Familiar with MS Office programs.
- Must be able to repetitively lift and carry 20 kg.
- Must be able to work safely in and around heavy equipment and drill rigs.
- Valid driver's license.
- Must be able to work in a remote camp setting on a rotational basis.

How to Apply

To apply, please send your cover letter and resume to jobs@westernalaskaminerals.com. Please include the 'Geologist - Core Logger' in the subject line of your email response.

While we thank all applicants for their interest, only those selected for an interview will be contacted.
